

A Graphical User Interface, Data Acquisition (DAQ) & Report Generation Software

## Features of TTBro Software

- Inbuilt drivers for automatic measurements. Allows editing & entering measurements manually.
- Gives alarms for invalid or incorrect measurements
- Easy storage & retrieval of all the test reports
- Prints Test Report complying with IS, IEC, ANSI & SABS
- Auto indexing & page numbering of test reports
- Analysis Report facility
- Prints detailed test report, short test report & extra short report
- Facility of printing formulae sheet
- Suggests Capacitor Bank Connection
- Instant data back-up facility
- ERP Integration
- Remote On-line test witness

## Benefits of TTBro Software

- Increases the testing productivity
- Reliability
- Consistency
- Reduction in testing process time

## TTBro Software suitable for testing of Transformer for

Generator	Power	Furnace	Distribution
Station	Auto	Rectifier	Locomotive
Dry Type	Neutral Ground	Unit Auxiliary	Solar / UPS

## TTBro software suitable for testing of Transformers with

Conductor	Aluminum / Copper
Phases	1/3
Windings	2/3/4/ Auto / Unloaded Tertiary
	Single / Dual / Split / Zigzag / Fork connection Auto Transformer
Vector Group	All, Single / Dual
Cooling	ONAN / ODAF / ODWF / OFAF / ONAF / ANAF / ANAN / AN
Testing Options	Final / Internal / Stage / After short circuit / Before short circuit / Customer witness inspection

**Global Leaders for setting up Integrated & Automated Test Laboratories for Transformers & Motors and Transformer Design Software**
